

Hi, I'm Rohan Panchal

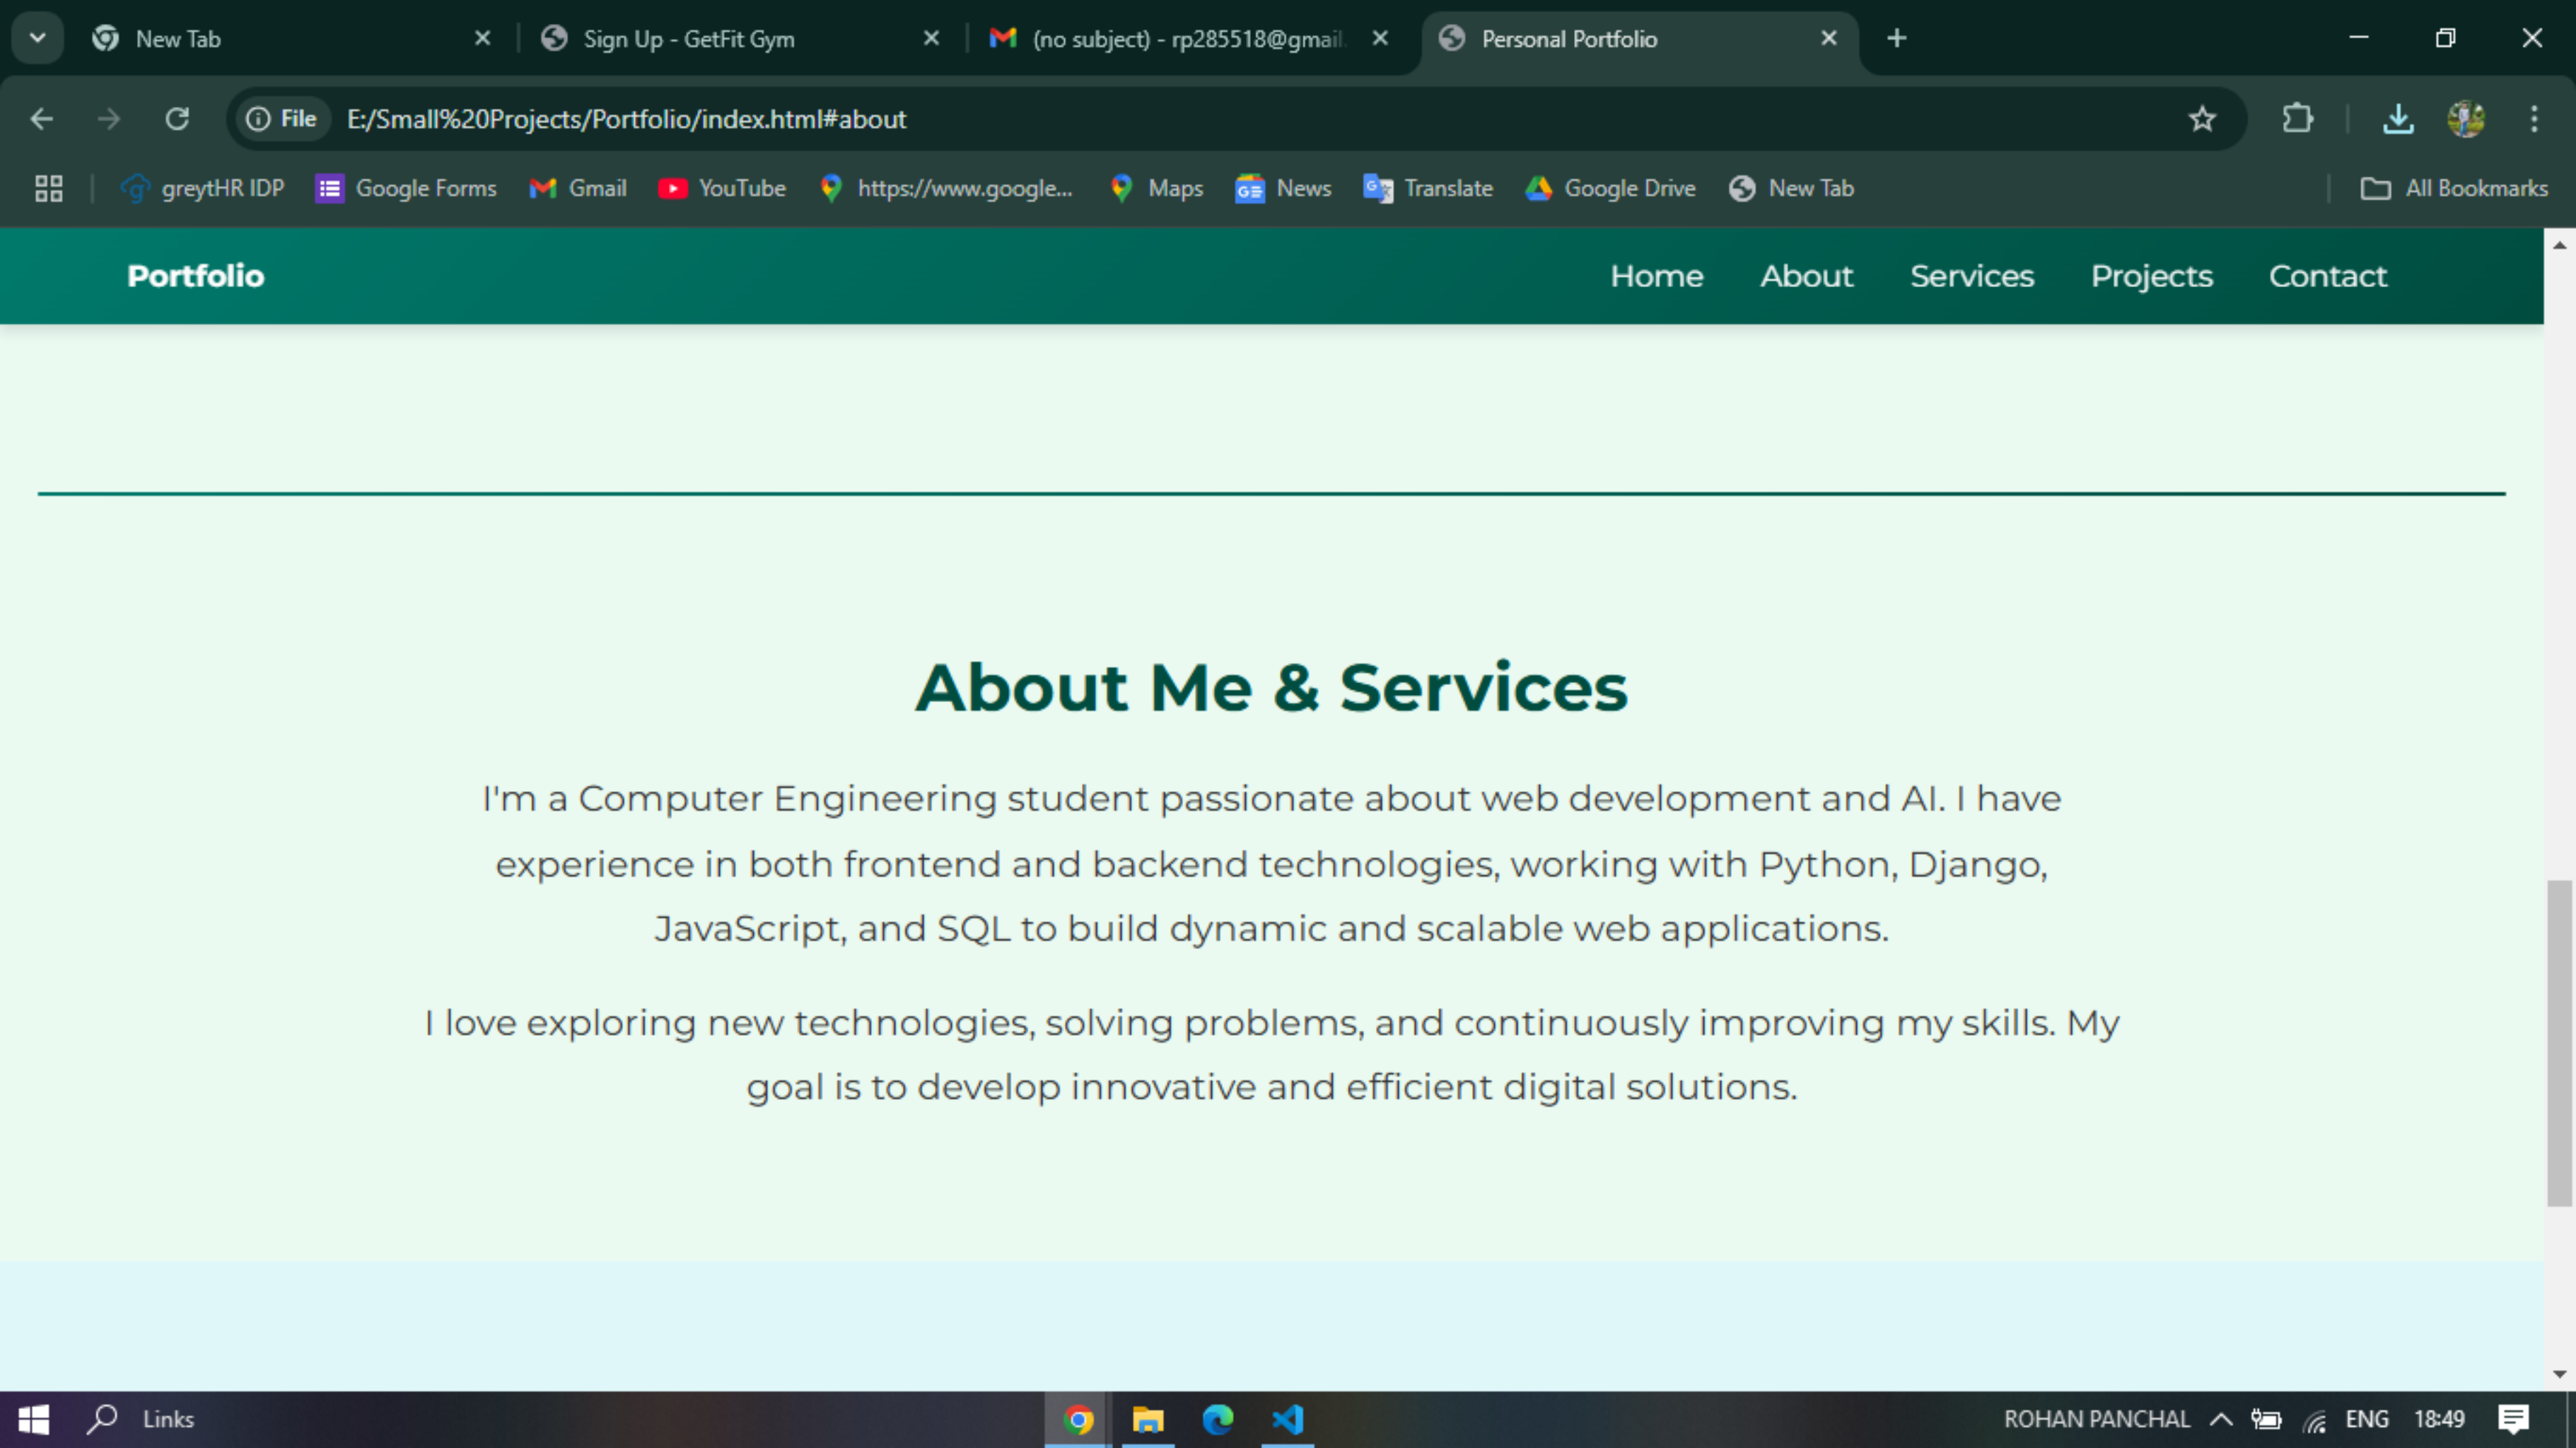

A passionate Computer Engineering student exploring the world of technology.

Web Developer | Frontend & Backend

Crafting responsive and user-friendly websites, working with modern frameworks, and developing efficient backend solutions.

Let's build a future together, one line of code at a time!

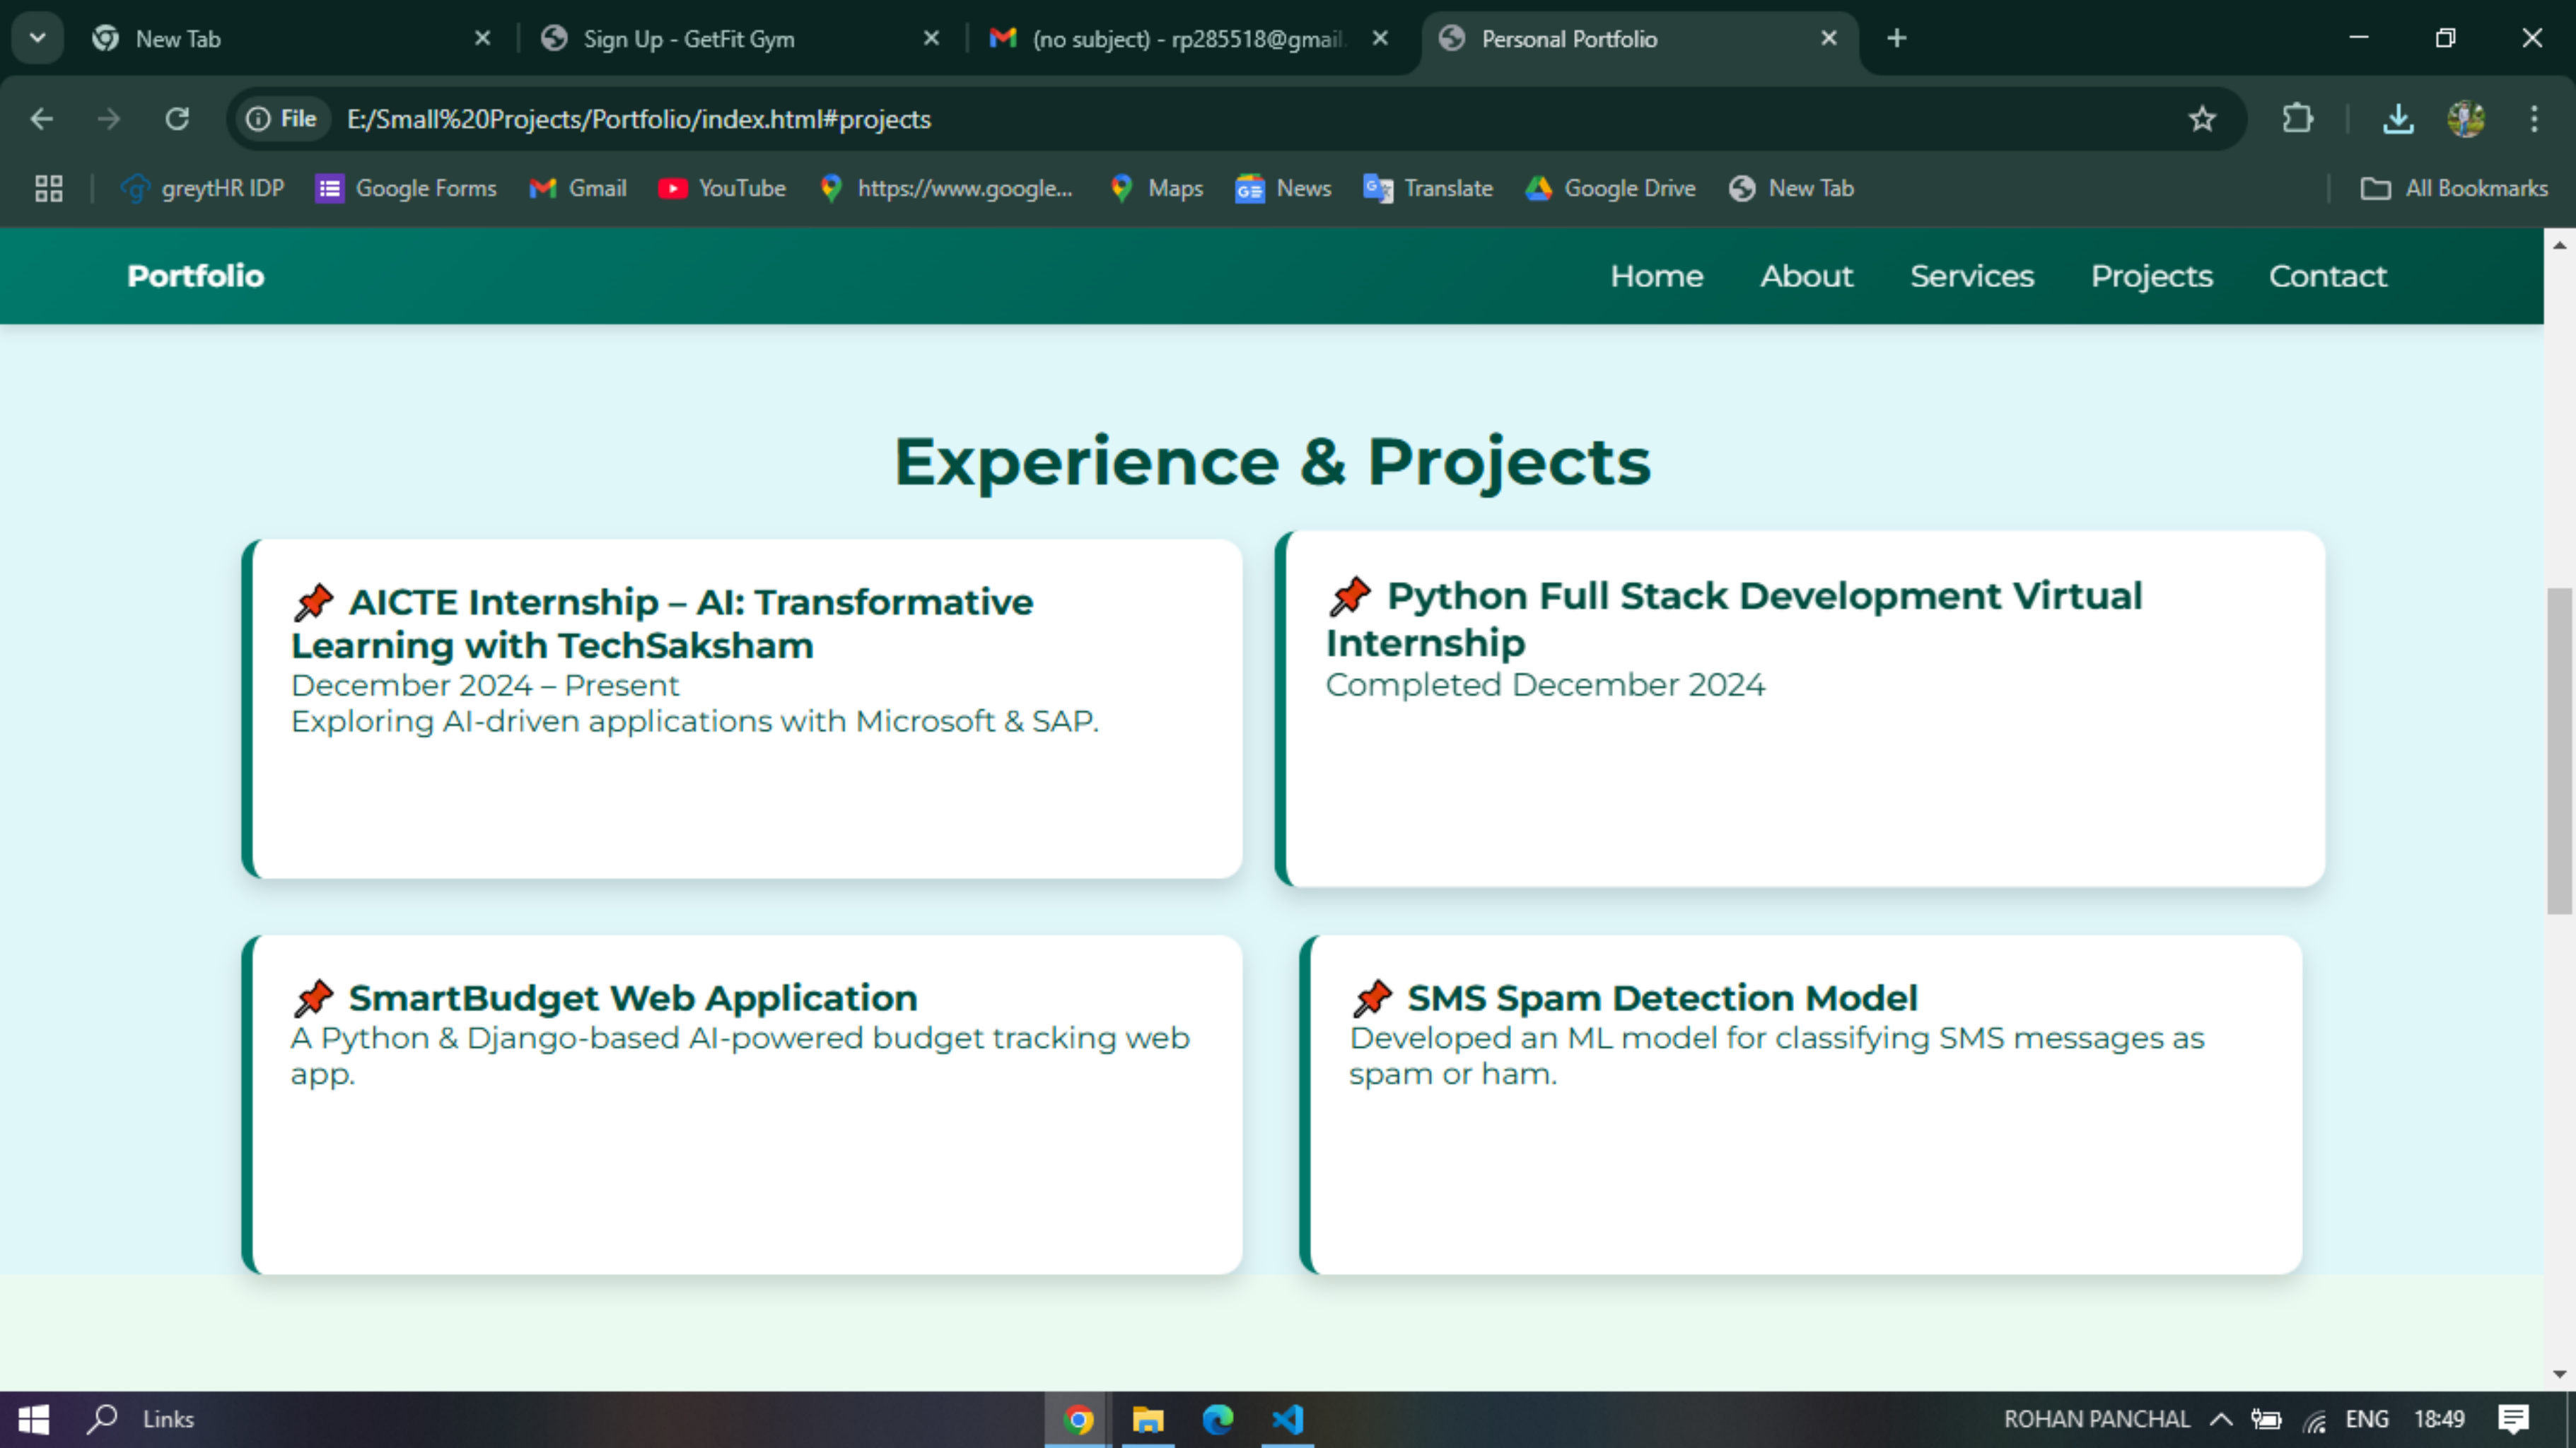

About Me & Services

I'm a Computer Engineering student passionate about web development and AI. I have experience in both frontend and backend technologies, working with Python, Django, JavaScript, and SQL to build dynamic and scalable web applications.

I love exploring new technologies, solving problems, and continuously improving my skills. My goal is to develop innovative and efficient digital solutions.

Experience & Projects

AICTE Internship – AI: Transformative Learning with TechSaksham

December 2024 – Present

Exploring AI-driven applications with Microsoft & SAP.

Python Full Stack Development Virtual Internship

Completed December 2024

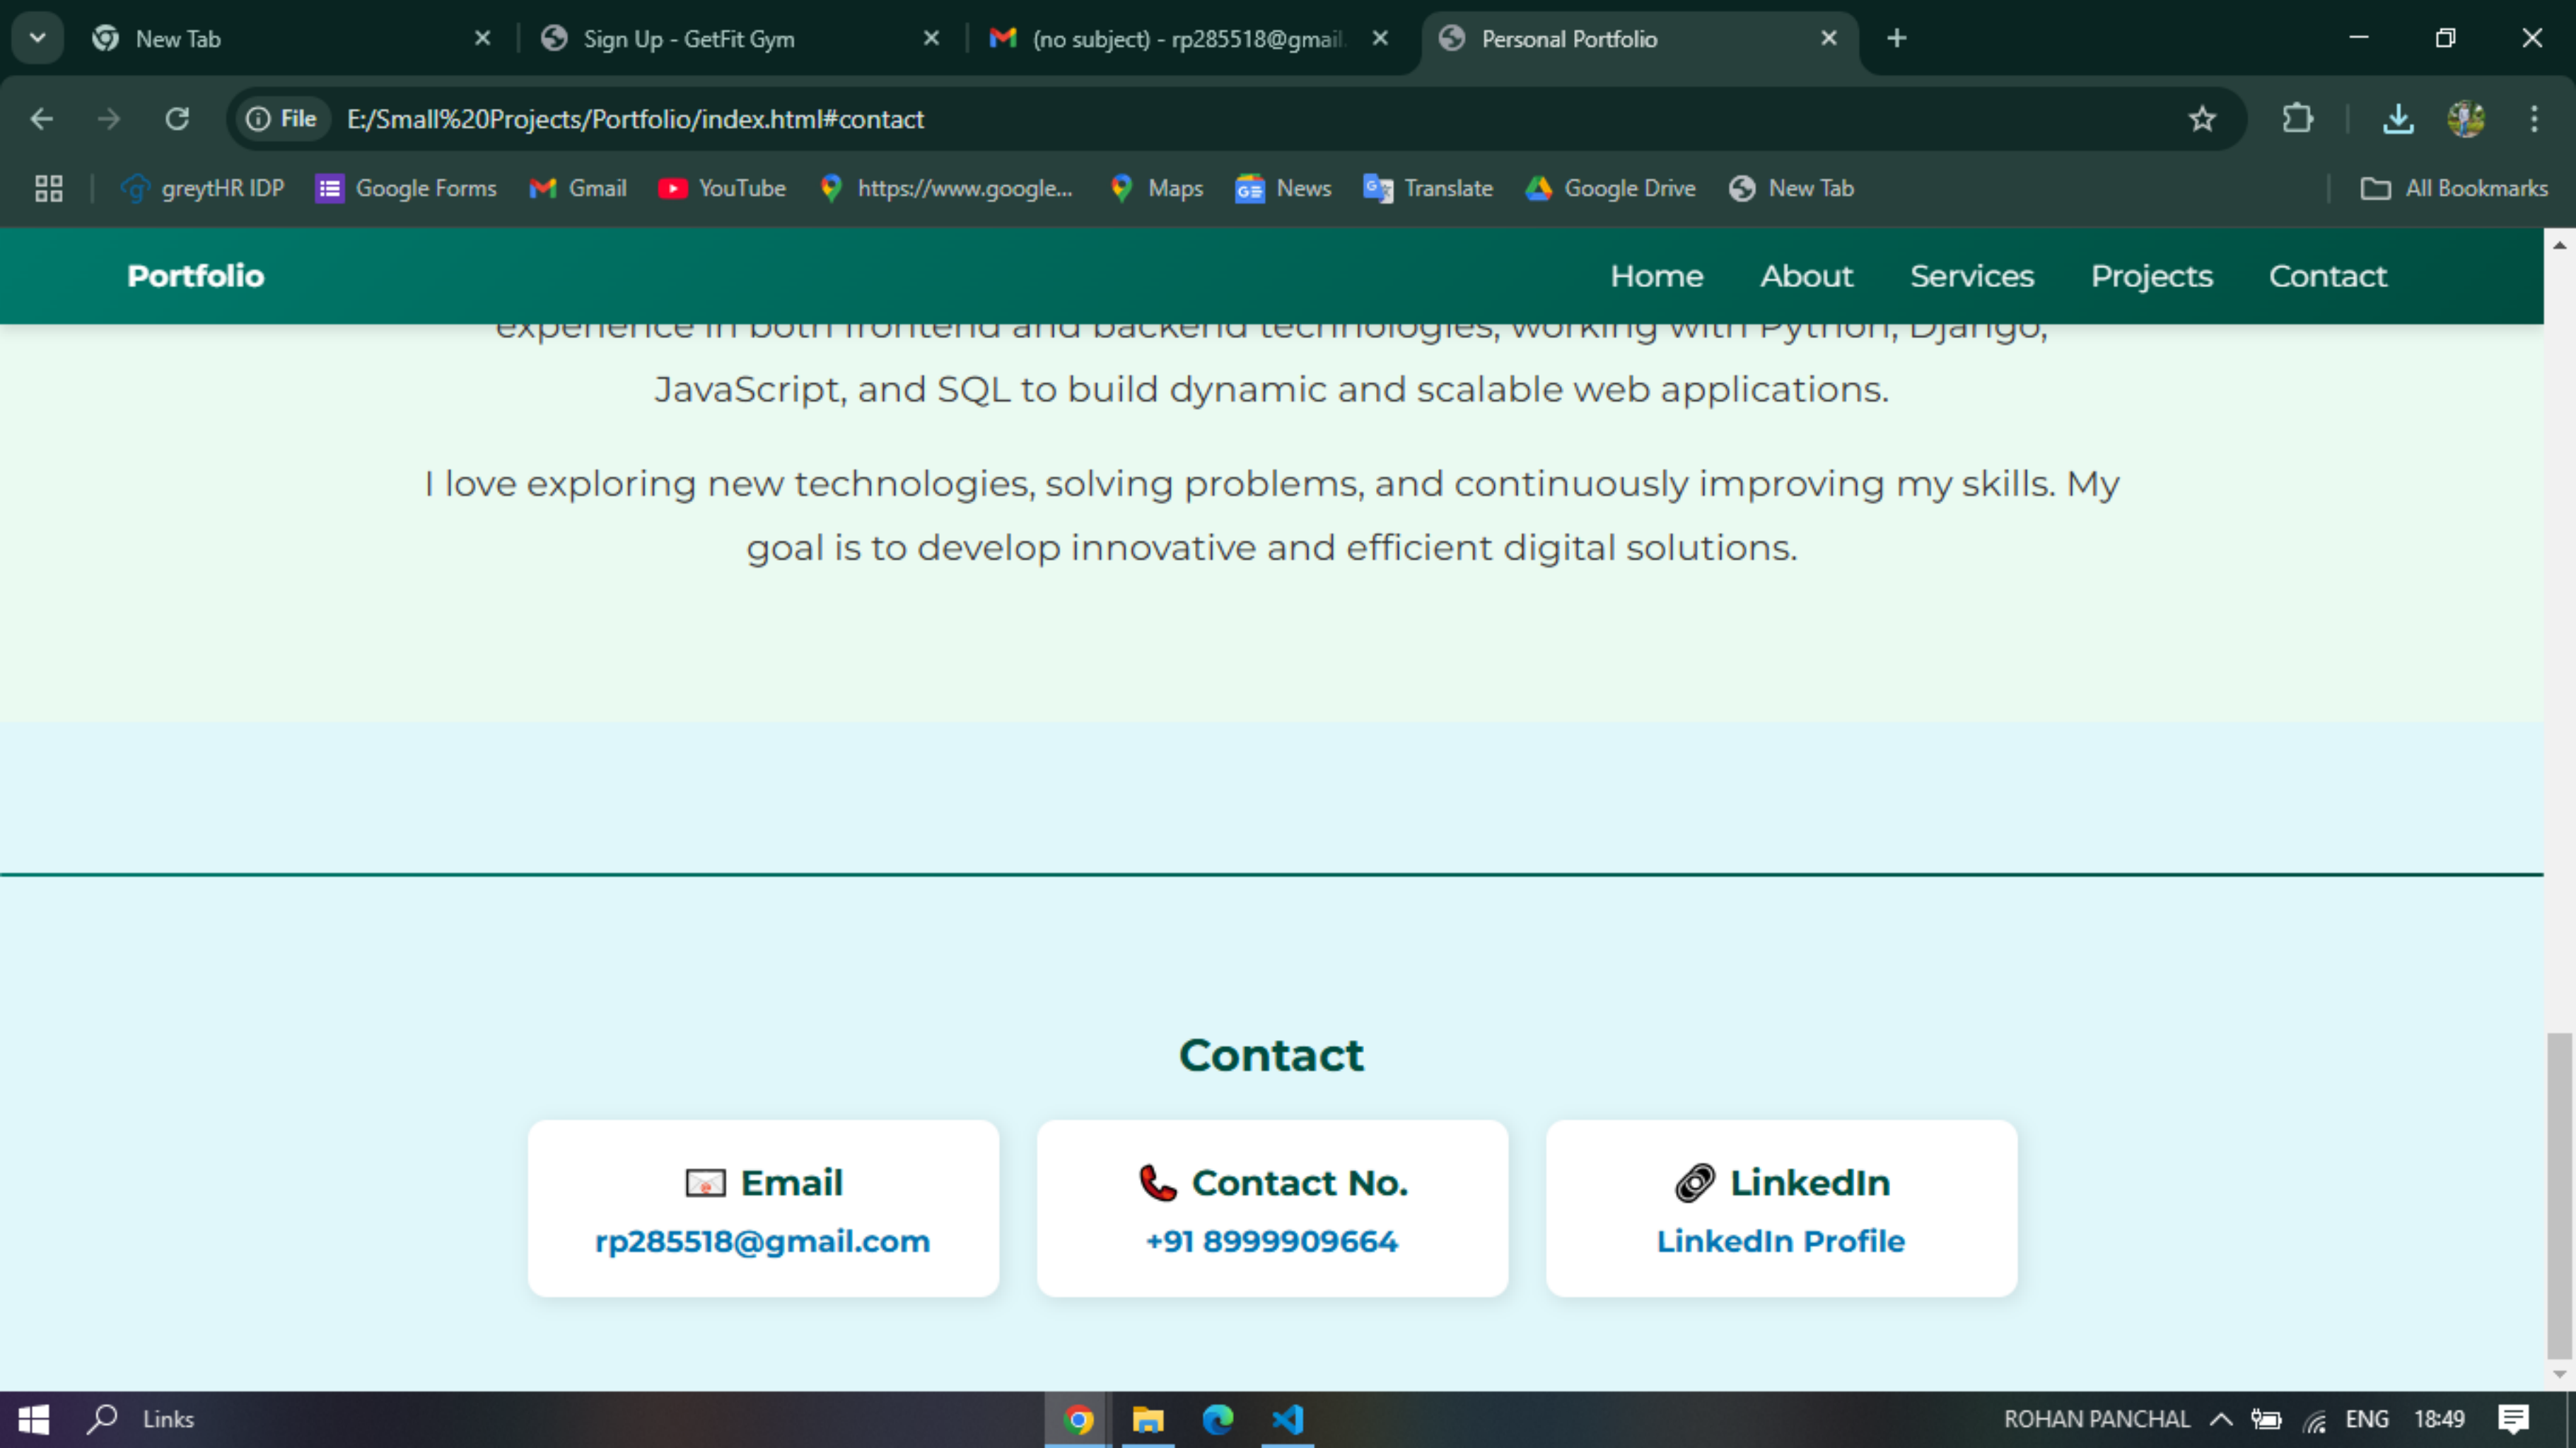

SmartBudget Web Application

A Python & Django-based AI-powered budget tracking web app.

SMS Spam Detection Model

Developed an ML model for classifying SMS messages as spam or ham.

experience in both frontend and backend technologies, working with Python, Django, JavaScript, and SQL to build dynamic and scalable web applications.

I love exploring new technologies, solving problems, and continuously improving my skills. My goal is to develop innovative and efficient digital solutions.
